John Jazpher DC. Carpio

Full-stack Developer

Bulakan, Bulacan, Philippines

Summary

I am a passionate Full Stack Developer with expertise in HTML, CSS, JavaScript, React.js, Node.js, PHP, MySQL, and MongoDB. My journey in web development has equipped me with a robust understanding of both front-end and back-end technologies, enabling me to create dynamic, responsive, and user-friendly web applications. With a strong foundation in front-end technologies, I build intuitive interfaces, while my back-end skills ensure efficient server-side logic and secure data management. I am always eager to learn and stay updated with the latest industry trends, ready to tackle innovative projects and deliver creative solutions.

Experience

Internship   **February 2024 - May 2024**
Bulacan State University   Malolos, Bulacan, Philippines

BulSU PMES is a system for evaluating and improving the performance of individual offices and departments within Bulacan State University. In my role, I was in charge of developing complete administrative and user form functionalities, which included database management and API development, as well as server-side scripting and seamless system interaction. My responsibilities also included developing frontend functionalities, with a primary focus on improving user features and experiences. I ensured that important system components functioned cohesively and efficiently by leveraging my knowledge in both the backend and frontend.

Skills: MonggoDB, Express, ReactJS, NodeJS

Frontend Developer (Freelance)   **May 2024 - July 2024**
Arc Corporation   Remote

As a skilled front-end developer, I brought solid experience in creating user-friendly, responsive websites that increased customer happiness and engagement. I used my knowledge in HTML, CSS, JavaScript, and React.js at Arc Corporation to create aesthetically pleasing and fluid user interfaces. My emphasis on performance and creative design made sure Arc Corporation's website was always state-of-the-art and productive.

Skills: React.js, HTML, CSS, JavaScript

Frontend Developer (Freelance)   **May 2024 - July 2024**
Eden HVAC & Home Efficiency   Remote

I used my knowledge of HTML, CSS, and JavaScript in conjunction with React.js to create visually appealing and interactive online interfaces at Eden HVAC & Home Efficiency. My commitment to cutting-edge design and top-notch functionality made sure Eden HVAC & Home Efficiency's web presence remained influential and up to date.

Skills: React.js, HTML, CSS, JavaScript

Education

BS Information Technology (BSIT)   **2020 - 2024**
Bulacan State University   Malolos, Bulacan, Philippines
Honors: *Magna Cum Laude*
